What is this product?

Type

The Fund is an investment company with variable capital. The Fund's value is dependent on the performance of the underlying assets and may go up as well as down. Any capital invested in the Fund may be at risk.

Objectives and Investment Policy

Investment Objective:

The Fund aims to track as closely as possible the returns of the S&P India Tech Index (the Index). The Fund will invest in, or gain exposure to, shares of companies which make up the Index.

Investment Policy:

The Index is a subset of the S&P India BMI Index (Parent Index) and measures the performance of the Indian share market, as determined by the Index Provider.

The Index measures the performance of the leading companies operating in technology related businesses from the Indian market based on their RBICS classification and operating in the following segments: software, digital technology, and communication. The companies must demonstrate a RBICS Revenue of 90% or 80% for current constituents.

The Index excludes companies with exposure to: controversial weapons, recreational & medical cannabis, thermal coal extraction & generation. The Index constituents are weighted based their free float market capitalisation, with the largest constituent weight capped at 15%, and all other constituents capped at 10%. The Index also incorporates dynamic capping; when a stock breaches the cap, the weight of that stock will be brought down to 2% below the cap. The Index is rebalanced on a semi-annual basis. Please refer to the Supplement for more details on Index description and exclusions.

The Fund is passively managed and aims to invest in the shares of the companies in generally the same proportion as in the Index. There may be circumstances when it is not possible or practical for the Fund to invest in all constituents of the Index. If the Fund cannot invest directly in the companies that constitute the Index, it may gain exposure by using other investments such as depositary receipts, funds or derivatives or may hold cash and cash equivalents.

The Fund may invest up to 10% of its assets in other funds and may invest up to 35% of its assets in securities from a single issuer during exceptional market conditions.

The Fund may invest up to 10% of its assets in total return swaps and contracts for difference. However, this is not expected to exceed 5%.

The Fund may also invest in derivatives for efficient portfolio management purposes (such as to manage risk and costs, or to generate additional capital or income) and for investment purposes.

- ◆ The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.
- ◆ The reference currency of the Fund is EUR. The reference currency of this share class is EUR.
- ◆ Income is reinvested.

- ◆ Authorised Participants only may deal in the Fund's shares directly with the UCITS.
- ◆ The Fund's shares are listed on one or more stock exchange(s).
- ◆ You may sell your investment on most working days.
- ◆ The anticipated level of tracking error in normal market conditions is expected to be 0.40%.
- ◆ The reference benchmark has a high level of concentration. This means that a small number of securities make up a significant proportion of the benchmark.

Intended Retail Investor

Investment in the Fund may be suitable for investors seeking capital appreciation with a five year time horizon through investments made primarily in equities that are listed or traded on Recognised Markets, as defined in the Prospectus. An investor should consider his/her personal tolerance for the daily fluctuations of the market before investing in the Fund. Investors should be prepared to bear losses.

An investment in the Fund is only suitable for investors who are capable of evaluating the risks and merits of such an investment, and who have sufficient resources to bear any loss as the Fund is not guaranteed and they may receive back less than the amount invested. The Fund is designed for use as part of a diversified investment portfolio. Prospective investors should consult with their financial advisor before making an investment.

Term:

The Fund does not have a maturity date.

The PRIIP Manufacturer cannot terminate the Fund unilaterally. The Board of Directors may furthermore decide to liquidate the Fund in certain circumstances set out in the prospectus and articles of incorporation of the Fund.

Details of how to do this are in the "Conversion of Shares - Primary Market" section of the Prospectus.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium, and poor market conditions are could impact our capacity to pay you.

Additional risks not included in the Summary Risk Indicator (SRI) include: Liquidity, Counterparty, Operational, Investment Leverage and Exchange Rate Risk. Please refer to the prospectus for other risks.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 5 Years		If you exit	
Investment of EUR 10,000		after 1 year	If you exit after 5 years
Minimum	The Fund is not covered by an investor compensation or guarantee scheme, you may lose some or all of the amount invested.		
Stress Scenario	What you might get back after costs	EUR2,650	EUR3,670
	Average return each year	-73.48 %	-18.17 %
Unfavourable Scenario	What you might get back after costs	EUR7,910	EUR9,610
	Average return each year	-20.94 %	-0.79 %
Moderate Scenario	What you might get back after costs	EUR10,380	EUR12,180
	Average return each year	3.76 %	4.02 %
Favourable Scenario	What you might get back after costs	EUR14,790	EUR18,190
	Average return each year	47.87 %	12.71 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between March 2015 and March 2020. The moderate scenario occurred for an investment between August 2017 and August 2022. The favourable scenario occurred for an investment between February 2016 and February 2021. A suitable benchmark was used where the Fund had insufficient history.

What happens if HSBC Investment Funds (Luxembourg) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the default of HSBC Investment Funds (Luxembourg) S.A.. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund. There is a potential liability risk for the Depositary if the assets of the Fund are lost. The Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations.

In the event of a bankruptcy or insolvency of the Depositary or other service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions and there may be a risk of default. The Fund is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- ◆ EUR 10,000 is invested.

Recommended Holding Period: 5 Years Investment of EUR 10,000		If you exit after 1 year	If you exit after 5 years
Total Costs		67 EUR	414 EUR
Annual cost impact % *		0.7%	0.7% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.72% before costs and 4.02% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
