HSBC US Dollar ESG Liquidity Fund

a sub-fund of HSBC Global Liquidity Funds Plc, (the "UCITS");
managed by HSBC Investment Funds (Luxembourg) S.A.

Class:G
ISIN:IE000SFY91A0

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide security of capital, daily liquidity and a return that is similar to US Dollar money markets while considering select environmental, social and governance (ESG) criteria and qualifies under Article 8 of the SFDR classification.

Investment Policy:

The Fund invests in a diversified portfolio of short-term securities, instruments, and obligations. These instruments are of high quality at the time of purchase and are eligible for investment under the Money Market Fund Regulation with an additional focus on the performance of the underlying issuers on a range of ESG metrics.

The Fund invests in short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by companies, governments, and government-related entities and either listed or traded on a Recognised Market, as detailed in the Prospectus.

The weighted average portfolio maturity of the Fund will not exceed 60 days.

The weighted average portfolio life of the Fund will not exceed 120 days.

The Fund seeks to identify issuers that are considered to be better at addressing ESG risks. An ESG score is assigned to each approved issuer in the Fund's universe that measures the performance of an issuer's business operations and governance based on select ESG criteria; such as emissions, resource use, human and workforce rights, management behaviour and corporate social responsibility.

The Fund uses a combination of screens such as: relative ESG scores, adherence to the United Nations Global Compact and sector specific screens to create the 'best in class' investable universe of issuers that are eligible for the Fund.

The Fund applies sector specific screens to identify and exclude issuers: responsible for the production of tobacco, nuclear armaments, and

other controversial weapons; and that derive more than 10% revenue from certain sectors such as thermal coal extraction.

The Fund's investments will, at the time of purchase, have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency, such as Standard & Poor's or Moody's.

The Fund may only invest in securities that are denominated in (or hedged back into) US dollars.

The Fund can invest in a range of short-term securities, instruments, and obligations such as, but not limited to: certificates of deposit (short-term certificates issued by banks); medium term, variable and floating rate notes; commercial paper; bankers acceptances; government bonds, corporate bonds, Eurobonds and treasury bills; and asset backed securities.

The Fund may invest in reverse repurchase agreements.

The Fund may also invest in financial derivative instruments. The Fund may use them for hedging purposes.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 1 because its price or simulated data has shown very low fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.

- ◆ **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- ◆ **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- ◆ **Liquidity Risk** Liquidity Risk is the risk that a Fund may encounter difficulties meeting its obligations in respect of financial liabilities that are settled by delivering cash or other financial assets, thereby compromising existing or remaining investors.
- ◆ **Money Market Fund Risk** The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- ◆ **Operational Risk** Operational risks may subject the Fund to errors affecting transactions, valuation, accounting, and financial reporting, among other things.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.12%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Past Performance

- ◆ The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- ◆ The Fund may charge a Liquidity Fee of up to 3.00% of the Net Asset Value per Share at the discretion of the Directors, if other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all remaining shareholders.
- ◆ A conversion charge may be payable.
- ◆ The ongoing charges figure shown here is an estimate of the charges as the share class has not been priced for a full financial year. The UCITS’ annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the “Charges and Expenses” section of the Fund’s Prospectus.

- ◆ Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- ◆ Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- ◆ The past performance of this share class is calculated in USD.
- ◆ The reference benchmark for the Fund, for comparison purposes only, is the SOFR (Secured Overnight Financing Rate).
- ◆ The Fund was launched on 12 October 2022.
