

## HSBC ETFs PLC

# HSBC PLUS Emerging Markets Equity Quant Active UCITS ETF

Marketing communication | Monthly report 31 August 2025 | HOES LN | USD Acc

## Investment objective

The Fund aims to provide long-term capital growth.

## Investment strategy

The Fund usually invests a minimum of 90% of net assets in shares of companies incorporated in emerging markets or those that earn the majority of their revenue from emerging markets. The Fund may invest in securities similar to shares including American Depositary Receipts, Global Depositary Receipts and Non-Voting Depositary Receipts which are issued by a bank or trust company evidencing ownership of shares of a non-US issuer and are alternatives to directly purchasing the underlying securities. The Fund may also invest in China A-shares either directly, indirectly through China A-shares Access Products or through other funds. The Fund may invest up to 10% of its assets in other funds, including HSBC funds. The Fund is an actively managed and has been categorised as an Article 6 fund for the purpose of the SFDR. The Investment Manager identifies shares which may or may not comprise the reference benchmark and uses a quantitative investment process to create a portfolio which focuses on risk premia offered by exposure to factors such as value, quality, momentum, low risk and size whilst minimizing the portfolio's risk characteristics through the application of a series of constraints established relative to the reference benchmark such as country, sector and stock weights. See the Prospectus for a full description of the investment objectives and derivative usage.

## Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

## Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.

The fund is a sub-fund of HSBC ETFs plc (“the Company”), an investment company with variable capital and segregated liability between sub-funds, incorporated in Ireland as a public limited company, and is authorised by the Central Bank of Ireland. The company is constituted as an umbrella fund, with segregated liability between sub-funds. Shares purchased on the secondary market cannot usually be sold directly back to the Company. Investors must buy and sell shares on the secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value per share when buying shares and may receive less than the current Net Asset Value per Share when selling them. Affiliated companies of HSBC Global Asset Management (UK) Limited may make markets in HSBC ETFs plc. UK based investors are advised they may not be afforded some of the protections conveyed by the Financial Services and Markets Act (2000), (the Act). The Company is recognised in the UK by the Financial Conduct Authority under section 264 of the Act. The shares in the company have not been and will not be offered for sale or sold in the United States of America, its territories or possessions and all areas subject to its jurisdiction, or to United States Persons. Investors and potential investors should read and note the risk warnings in the prospectus, relevant KID and Fund supplement (where available) and additionally, in the case of retail clients, the information contained in the supporting SID.
