

HSBC Global Liquidity Funds Plc

HSBC US Treasury Liquidity Fund

Marketing communication | Monthly report 30 June 2025 | Share class B

Investment objective

The Fund aims to provide security of capital, daily liquidity and a return that is similar to US dollar treasury markets.

Investment strategy

The Fund is actively managed. The Fund will invest in a diversified portfolio of US government money market instruments. These instruments will be short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by the Government of the United States. The Fund's investments will, at the time of purchase, have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency, such as Standard & Poor's or Moody's. The Fund can invest in a range of US government money market instruments such as: US treasury – bills, notes and bonds. The Fund may invest in reverse repurchase agreements. The Fund may also invest in cash and money market instruments (including overnight time deposits). The Fund's liquidity is daily – meaning investors can redeem their investment on any business day. The Fund is classified as a Public Debt Constant NAV Money Market Fund under the Money Market Fund Regulations. The Fund's primary currency exposure is to US dollars. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
