What is this product?

Type

The Fund is an investment company with variable capital. The Fund's value is dependent on the performance of the underlying assets and may go up as well as down. Any capital invested in the Fund may be at risk.

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide long term capital growth.

Investment Policy:

In normal market conditions, the Fund will invest at least 90% of its assets in shares of companies of any size, that are based anywhere in the world, including emerging markets.

The Investment Manager identifies stocks from the MSCI All Country World Index and ranks them from the least attractive to most attractive based upon certain factors, such as Value, Quality, Momentum, Low Risk and Size.

The Investment Manager will then quantitatively select the shares to create a portfolio which maximises the exposure to the highest ranked stocks whilst minimising the Fund's risk characteristics through the application of a series of constraints such as sector and company weights.

The Fund may invest in Chinese equities. The Fund may also invest in China A-shares either directly (through the Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect) or indirectly through China A-shares Access Products (CAAP) or through funds.

The Fund may invest up to 10% of its assets in other funds, including other HSBC funds.

The Fund may invest up to 10% of its assets in total return swaps and contracts for difference. However, this is not expected to exceed 5%.

The Fund may also invest in derivatives for efficient portfolio management purposes (such as to manage risk and costs, or to generate additional capital or income) and for investment purposes.

- ◆ The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.
- ◆ The reference currency of the Fund is USD. The reference currency of this share class is USD.
- ◆ Income is distributed.
- ◆ Authorised Participants only may deal in the Fund's shares directly with the UCITS.
- ◆ The Fund's shares are listed on one or more stock exchange(s).
- ◆ You may sell your investment on most working days.
- ◆ The Fund is actively managed and does not track a benchmark. The reference benchmark for the Fund is MSCI AC World Net.
- ◆ The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will

be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.

- ◆ The deviation of the Fund's performance relative to the benchmark is also monitored, but not constrained, to a defined range.

Intended Retail Investor

Investment in the Fund may be suitable for investors seeking capital appreciation with a five year time horizon through investments made primarily in equities that are listed or traded on Recognised Markets, as defined in the Prospectus. An investor should consider his/her personal tolerance for the daily fluctuations of the market before investing in the Fund, as the volatility of the Fund may be high. Investors should be prepared to bear losses. Shares in the Fund will be available to both retail and institutional investors.

An investment in the Fund is only suitable for investors who are capable of evaluating the risks and merits of such an investment, and who have sufficient resources to bear any loss as the Fund is not guaranteed and they may receive back less than the amount invested. The Fund is designed for use as part of a diversified investment portfolio. Prospective investors should consult with their financial advisor before making an investment.

Term:

The Fund does not have a maturity date.

The PRIIP Manufacturer cannot terminate the Fund unilaterally. The Board of Directors may furthermore decide to liquidate the Fund in certain circumstances set out in the prospectus and articles of incorporation of the Fund.

Details of how to do this are in the "Conversion of Shares - Primary Market" section of the Prospectus.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 5 Years Investment of USD 10,000		If you exit after 1 year	If you exit after 5 years
Minimum	The Fund is not covered by an investor compensation or guarantee scheme, you may lose some or all of the amount invested.		
Stress Scenario	What you might get back after costs	USD1,730	USD3,200
	Average return each year	-82.70 %	-20.36 %
Unfavourable Scenario	What you might get back after costs	USD7,970	USD10,840
	Average return each year	-20.33 %	1.62 %
Moderate Scenario	What you might get back after costs	USD11,100	USD15,350

Favourable Scenario	What you might get back after costs	USD15,670	USD19,040
	Average return each year	56.68 %	13.75 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between March 2015 and March 2020. The moderate scenario occurred for an investment between September 2015 and September 2020. The favourable scenario occurred for an investment between June 2016 and June 2021.

What happens if HSBC Investment Funds (Luxembourg) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the default of HSBC Investment Funds (Luxembourg) S.A.. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund. There is a potential liability risk for the Depositary if the assets of the Fund are lost. The Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations.

In the event of a bankruptcy or insolvency of the Depositary or other service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions and there may be a risk of default. The Fund is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- ◆ USD 10,000 is invested.

Recommended Holding Period: 5 Years Investment of USD 10,000		If you exit after 1 year	If you exit after 5 years
Total Costs		46 USD	353 USD
Annual cost impact % *		0.5%	0.5% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.44% before costs and 8.95% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
