

## HSBC Global Investment Funds

# RMB FIXED INCOME

Marketing communication | Monthly report 30 June 2025 | Share class BC

### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Renminbi (RMB) bonds and other similar securities.

### Investment strategy

The Fund is actively managed. The Fund primarily invests in bonds and other similar securities denominated in RMB either issued outside of the People's Republic of China (PRC), or issued within the PRC and traded on the China Interbank Bond Market (CIBM) or stock exchanges in the PRC. The Fund will invest in investment grade, non-investment grade and unrated bonds and other similar securities which are either issued or guaranteed by governments, government agencies and supranational bodies or by companies. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. The Fund may invest up to 100% of its assets in Chinese onshore bonds and similar securities through the China Interbank Bond Market (CIBM), with a maximum of 10% in non-investment grade rated. The Fund may also invest up to 10% in cash and cash equivalents, and up to 10% in other funds. The Fund may invest up to 10% in convertible bonds and up to 10% in contingent convertible bonds. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

## Risk Disclosure

- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

## Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
