## GLOBAL SHORT DURATION HIGH YIELD BOND

Monthly report - 31 May 2021

**HSBC**  
Global Asset  
Management

### Share class BD

#### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of short duration non-investment grade bonds.

#### Investment strategy

In normal market conditions, the Fund will invest at least 90% in non-investment grade bonds and unrated bonds issued by governments, government-related entities and companies that are based in developed markets; including up to 10% in asset-backed securities and mortgage-backed securities. The Fund may also invest up to 10% in bonds issued by companies that are based in or carry out the larger part of their business in emerging markets. The Fund may invest up to 30% in investment grade bonds to manage liquidity and risk. The Fund may invest up to 10% in onshore Chinese bonds which are issued within the People's Republic of China and traded on the China Interbank Bond Market. The Fund may invest up to 10% in securities issued by any single government issuer with a non-investment grade rating. The Fund may invest up to 10% in convertible bonds, up to 15% in contingent convertible securities and up to 10% invested in other funds. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.

#### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.

## Risk Disclosure

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the Fund's potential risks can be found in the Key Investor Information Document and Prospectus.
