

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL LOWER CARBON BOND

Legal Entity Identifier: 213800QEYRDOIIO7S350

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28.28% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- Active consideration of low carbon intensity investments compared to the Reference Benchmark.
- The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
- Minimum environmental standards through exclusion of business activities that deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Identification and analysis of a company's environmental characteristics included, but not limited to, physical risk of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. Analysis of the shared of investment involved in controversial weapons.

The Bloomberg Global aggregate Corporate Diversified Hedged USD was used to measure the sub-fund's carbon intensity, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) is (indicated in the table below by their preceding number compared to). The data used in the calculation of PAI values are sourced from data vendors. They can be based on issuer disclosures or estimated by the data vendors in the absence of issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.33	7.20
E Pillar	7.71	7.52
S Pillar	5.25	5.09
G Pillar	6.07	5.85
1. GHG Emissions - Metric tons CO2 equivalents	2,135.15	501,925.58
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	13.61	59.18
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	55.21	97.31
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.12%	0.29%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Global Aggregate Corporates Diversified

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.33	7.20
	31 March 2023	7.24	6.98
E Pillar	31 March 2024	7.71	7.52
	31 March 2023	7.62	7.28
S Pillar	31 March 2024	5.25	5.09
	31 March 2023	5.30	5.02
G Pillar	31 March 2024	6.07	5.85
	31 March 2023	5.87	5.84
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	2,135.15	501,925.58
	31 March 2023	2,015.17	618,146.33
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	13.61	59.18
	31 March 2023	13.74	61.93
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	55.21	97.31
	31 March 2023	57.85	185.66
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	1.12%	0.29%
	31 March 2023	1.83%	1.86%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Issuers in which the sub-fund invests would be expected to comply with the UNGC and related standards. Issuers having clearly violated one, of the ten principles of the UNGC were systematically excluded. The sub-fund conducts enhanced ESG due diligence on issuers that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance would also be taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Paccar Financial Corp. 4.6% 31-jan-2029	Financials	1.62%	United States of America
New York Life Global Fundin g 4.7% 29-jan-2029	Financials	1.21%	United States of America
Ashtead Capital, Inc. 5.8% 15-apr-2034	Industrials	1.16%	United Kingdom

Deutsche Bank Aktiengesellschaft 5.0% 05-sep-2030	Financials	0.75%	Germany

Cash and derivatives were excluded

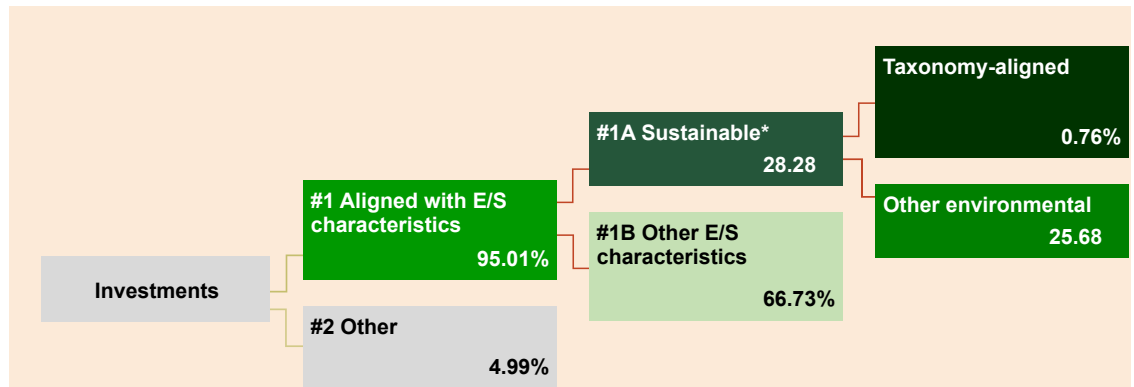

What was the proportion of sustainability-related investments?

26.78% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	39.85%
Other	16.28%
<i>Oil & Gas Storage & Transportation</i>	<i>0.88%</i>
Cash & Derivatives	3.76%
Government	6.57%
Communication Services	6.07%
Industrials	5.41%
Consumer Staples	4.06%
Real Estate	3.92%
Health Care	3.70%
Utilities	3.37%
<i>Electric Utilities</i>	<i>1.95%</i>
<i>Multi-Utilities</i>	<i>1.26%</i>
Information Technology	3.17%
Consumer Discretionary	2.99%
Materials	0.86%
Total	100.00%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 0.42%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.04%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.72%	0.00%
Revenue - Non Taxonomy-aligned	99.24%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.07%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.77%	0.00%
CAPEX - Non Taxonomy-aligned	98.16%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.11%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.45%	0.00%
OPEX - Non Taxonomy-aligned	98.43%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 25.68%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
