

HSBC Global Investment Funds

GLOBAL LOWER CARBON BOND

Monthly report 28 February 2023 | Share class BCHEUR

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of bonds that has a lower carbon footprint than its reference benchmark. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 70% of its assets in investment grade and non-investment grade bonds issued by companies that are based in developed markets and emerging markets. The Fund will invest in bonds issued by companies with consideration of their Lower Carbon Criteria. The Fund will also invest in Green Bonds meeting the Green Bond Principles of the International Capital Market Association. The Fund will not invest in companies involved in the production of tobacco or related activities. The Fund may invest up to 10% in onshore Chinese bonds which are issued within the People's Republic of China and traded on the China Interbank Bond Market. The Fund may invest up to 10% in non-investment grade bonds and up to 10% in ABS and MBS. The Fund may invest up to 10% in contingent convertible securities and up to 10% in other funds, including HSBC funds. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Company carbon data, can often be “partially disclosed”, i.e. partial geographic coverage, or incomplete operational data. Trucost* undertakes analysis and research to assess company reported results. The proprietary Trucost model enables an estimate of total emissions which relies on more than just reported financial data. Where securities are not covered by Trucost, HSBC assigns a proxy value based on the average intensity score of comparable companies.*Trucost are a division of S&P Global; they assess risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Investor Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
