

HSBC Global Investment Funds

GLOBAL GOVERNMENT BOND

Monthly report 30 November 2023 | Share class ZM1HJPY

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of government bonds, while promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

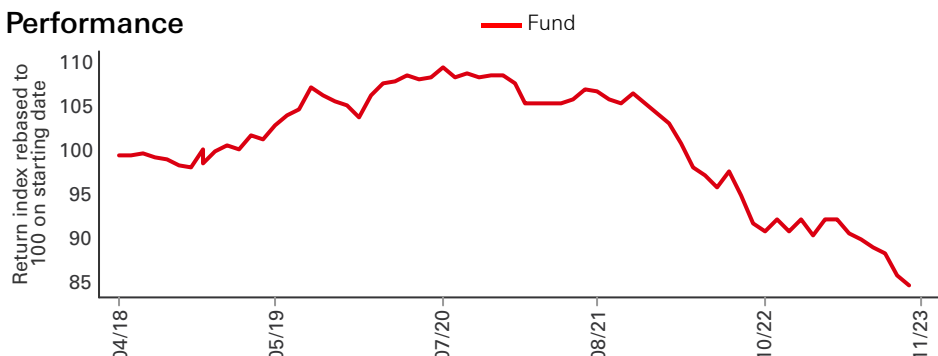

The Fund is actively managed. In normal market conditions, the Fund will invest at least 70% of its assets in investment grade bonds issued by governments, government-related entities and supranational entities based in developed or emerging markets. The Fund includes the identification and analysis of a company's ESG Credentials as an integral part of the investment decision making process to reduce risk and enhance returns. The Fund will not invest in bonds issued by companies with involvement in specific excluded activities, such as: companies involved in the production of controversial weapons and tobacco; companies with more than 10% revenue generated from thermal coal extraction; and companies with more than 10% revenue generated from coal-fired power generation. The Fund may invest up to 10% of its assets in onshore Chinese bonds, up to 10% in asset-backed securities and mortgage-backed securities, up to 10% in non-investment grade bonds and up to 10% in other funds. The Fund's primary currency exposure is to US dollars. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
