

HSBC Global Investment Funds

US HIGH YIELD BOND

Marketing communication | Monthly report 30 June 2025 | Share class IC

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of US Dollar denominated high yield bonds, including non-investment grade rated bonds and other higher yielding securities.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 90% of its assets in US dollar denominated non-investment grade rated and other high yield bonds. The bonds are issued by companies that are based in developed markets, or issued or guaranteed by governments, government agencies, local and regional governments, or supranational bodies in any country including emerging markets. At least 70% of the Fund's assets will be invested in securities issued by companies that are based in the US. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. The Fund may gain exposure to asset-backed securities and mortgage-backed securities. The Fund may invest up to 10% in other funds, up to 20% in bonds issued in emerging markets, up to 15% in contingent convertible securities, and up to 10% in securities issued by or guaranteed by any single government issuer with a credit rating below investment grade. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
