

HSBC Global Investment Funds

EURO BOND

Monthly report 29 February 2024 | Share class XCHJPY

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of bonds (denominated in Euros), while promoting environmental, social and governance (ESG) characteristics. The Fund also aims to achieve a higher ESG rating than the weighted average of the constituents of its reference benchmark. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. The Fund will invest normally at least 90% in high quality bonds or similar securities which are denominated in Euros and normally invest in bonds issued by governments, government related agencies or companies. The Fund may also invest in securities from any country including developed markets and emerging markets. The Fund will not invest in companies with involvement in specific excluded activities, such as: companies involved in the production controversial weapons and tobacco; companies with more than 10% revenue generated from thermal coal extraction; and companies with more than 10% revenue generated from coal-fired power generation. The Fund may invest up to 10% in bonds issued by issuers based in emerging markets, up to 10% in asset-backed securities and mortgage-backed securities, up to 10% in contingent convertible securities, and up to 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

Share Class Details

Key metrics

NAV per Share	JPY 8,226.83
Performance 1 month	-1.32%

Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund’s investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund’s performance and underlying investments’ weightings relative to the benchmark are monitored, but not constrained, to a defined range.
