

HSBC Global Investment Funds

US INCOME FOCUSED

Marketing communication | Monthly report 30 June 2025 | Share class AM3HRMB

Investment objective

The Fund aims to provide income by investing in a diversified portfolio of assets related to the United States of America (USA).

Investment strategy

The Fund is actively managed and is not constrained by a benchmark. At least 70% of the Fund's exposure is to bonds, shares, money market instruments, cash and other assets from USA related issuers. Other assets include real estate investment trusts (REITs), asset-backed securities, mortgage-backed securities and alternative investment strategies. The Fund gains exposure up to 100% to bonds that are investment grade, non-investment grade and unrated issued or guaranteed by governments, government-related entities, supranational entities and companies. The Fund gains exposure of up to 70% in shares issued by companies of any size. Exposures will be achieved through investing directly into markets, derivative instruments or investing in other funds. The Fund may invest up to 30% in shares and bonds, and up to 10% indirectly into commodities issued by non-USA based issuers. The Fund may invest up to: 45% in non-investment grade bonds; 10% in convertible bonds, 10% in contingent convertible bonds; 15% in asset backed securities and mortgage-backed securities; 30% in closed-ended REITs; and 50% in other funds. The Fund's primary currency exposure is to the USD. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Risk Disclosure

- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless. The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Real estate and related investments can be negatively impacted by any factor that makes an area or individual property less valuable.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
