

HSBC Global Investment Funds

ESG Short Duration Credit Bond

Marketing communication | Monthly report 31 March 2025 | Share class BM3HGBP

Investment objective

The Fund aims to provide long term capital growth and income by investing in a diversified portfolio of bonds with an expected average duration of between 1 and 3 years and an average credit rating of investment grade, that seeks a higher environmental, social and governance (ESG) score and lower carbon intensity (ESG and Lower Carbon Criteria), than the reference benchmark, while promoting ESG characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed and is not constrained by a benchmark.

The Fund aims to invests at least 70% of its assets in short duration investment grade, non-investment grade and unrated bonds, and similar securities issued by governments, government-related entities, supranational entities or companies meeting certain ESG and Lower Carbon Criteria.

The ESG and Lower Carbon Criteria, together with fundamental qualitative company analysis, are used to determine the Fund's investible universe. Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies

The Fund's primary currency exposure is to the US Dollar, and it may invest up to 30% in bonds issued in emerging markets and up to 20% in asset backed securities and mortgage-backed securities.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
